C-COM SATELLITE ANTENNA CUSTOMIZED FOR RAPID DEPLOYMENT

OTTAWA, February 15, 2006 – C-COM Satellite Systems Inc. (TSXV: CMI) and Orbital Data Net, a Columbia, Missouri based C-COM value added reseller has announced today the availability of a Rapid Deployment Trailer, which consist of the C-COM developed iNetVu auto-deploying satellite antenna product and the Orbital Data Net designed Aeroshell SatCom™ trailer.

The trailer nicknamed “the EGG” provides quick and secure mobility for the enclosed iNetVu Mobile auto-deploying satellite antennas. The combined solution enables emergency responders and military forces to store and deploy satellite based communication equipment in the field by ground or air. The EGG breaks down quickly and fits into a standard DOD shipping container for rapid deployment. In the field the EGG provides extensive features that support both tactical as well as recovery operations.

“The Aeroshell SatCom™ Trailer developed by Orbital Data Net enhances the capabilities of the iNetVu Mobile antennas by opening up a vertical market for military and specialized recovery operations. This self contained unit is capable of silent operation for hours, even days, utilizing its internal batteries. We are looking forward to working with Orbital Data Net to deliver this unique combined solution to a number of new vertical markets” said Leslie Klein, president and CEO of C-COM Satellite Systems Inc.

According to Orbital Data Net, Inc. CEO, Greg Heifner, “This opportunity to partner with C-COM and supply this innovate package brings into focus our desire to continue to distinguish ourselves in providing leading edge, simple solutions that can provide primary connections for those in remote areas and backup connections to those who must maintain connectivity at all times. The iNetVu 1.2 meter antenna fits the Aeroshell perfectly and ties into our on-board support system in a seamless fashion. We have used this antenna system in past projects and have had excellent performance out of it.”

About C-COM Satellite Systems, Inc.

C-COM Satellite Systems, Inc. is a leader in the development and deployment of commercial grade mobile satellite-based technology for the delivery of two-way high-speed Internet, VoIP and Video services into vehicles. C-COM has developed a unique proprietary Mobile auto-deploying (iNetVu™) antenna that allows the delivery of high-speed satellite based Internet services into vehicles while stationary virtually anywhere where one can drive. The iNetVu Mobile antenna has also been adapted to be deployable from transportable platforms. The company's satellite-based products and services deliver high-quality, cost-effective solutions for both fixed and mobile applications throughout the world. More information is available at: www.c-comsat.com

iNetVu™ is a registered trademark of C-COM Satellite Systems Inc.

About Orbital Data Net.

Orbital Data Net, Inc., based in Columbia, Missouri, specializes in mobile emergency operation centers, building specialized products like the Aeroshell Satcom trailer (EGG). Orbital Data Net also provides corporate network backup (Business Continuity of Services) for banking and other entities, corporate and governmental tele-commuters (specialized VPN via satellite), Internet for remote communities, military communications, SCADA and video surveillance. For more information about Orbital Data Net, refer to its website at www.OrbitalData.net or call 573-445-8101.
