

C-COM DISCLAIMER

Legal Notice:

Certain written and oral statements included in this presentation may constitute “forward-looking information” reflecting the current expectations of C-COM Satellite Systems Inc. (“C-COM”). For example, statements about market opportunities, C-COM’s ability to capitalize on such opportunities, new products, features and functionality, potential growth rates, extrapolated revenues and other statements about any future expectation or event, are all forward-looking information. This information reflects C-COM’s current beliefs with respect to future events and is based on information currently available to management. Forward-looking information involves significant known and unknown risks, uncertainties and assumptions. Many factors could cause actual results, performance or events to be materially different from those implied or expressed by forward-looking information in this presentation. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking information prove incorrect, actual results, performance or events could vary materially from those expressed by forward-looking information in this presentation. Although forward-looking information contained in this presentation is based upon what C-COM believes to be reasonable assumptions, C-COM cannot provide assurances that actual results, performance or events will be consistent with the forward-looking information in this presentation and cautions that undue reliance should not be placed on the forward-looking information. This presentation was originally given on May 4th, 2022. The forward-looking information is given as of the date on which this presentation was first given and may be out of date or proven inaccurate by the time this presentation is viewed. C-COM does not assume any obligation to update or revise this presentation to reflect new events or circumstances, except as required by law. Viewers should view the totality of C-COM’s public disclosure available at www.SEDAR.com including C-COM’s most recent MD&A located at www.SEDAR.com which describes risk factors associated with C-COM’s business and an investment in C-COM. Those risk factors are incorporated into this presentation by reference.

Nothing in this presentation is intended to be an offer to sell or a solicitation for offers to buy securities of C-COM in any jurisdiction. C-COM was not undertaking or contemplating a sale of securities or accepting offers to acquire securities from C-COM as of the date on which this presentation was first given.

C-COM – Pioneer in Mobile VSAT

- C-COM is an Ottawa-based technology company focused on research, development and design of fully motorized, auto-deploy, mobile satellite antenna products (**iNetVu®**).
- Established in 1997, C-COM is one of the largest Comm-On-The-Pause (COTP) mobile VSAT manufacturers in the world.
- Company is developing highly disruptive antenna technology (electronically steerable phased array (**ESA**) and Beamformer Integrated Circuits (**BFIC**)).

C-COM by the Numbers

- 11,000+:** iNetVu® commercial mobile VSAT systems sold
- 106:** Number of countries in which you will find iNetVu®
- 600+:** Active dealer partners worldwide
- 41:** Antenna models available of the iNetVu® auto-acquire, motorized antenna
- 10:** Modem manufacturers PLUG & PLAY Integrated with iNetVu® (35 different modem models)
- 12:** Antenna sizes available (60cm, 74cm, 75cm, 80cm, 98cm, 1.0m, 1.2m, 1.3m, 1.5m, 1.8m and 2.4m)
- 4:** Formats of antenna (Driveaway, Flyaway, Manpack, Fixed Motorized)
- 4:** Bands of antenna available (Ka, Ku, C & X band)
- \$23 million:** Working Capital including **\$16 million in cash** (as of August 2025)
- \$0:** Debt

Note: As of August 2025. All figures in \$CAD

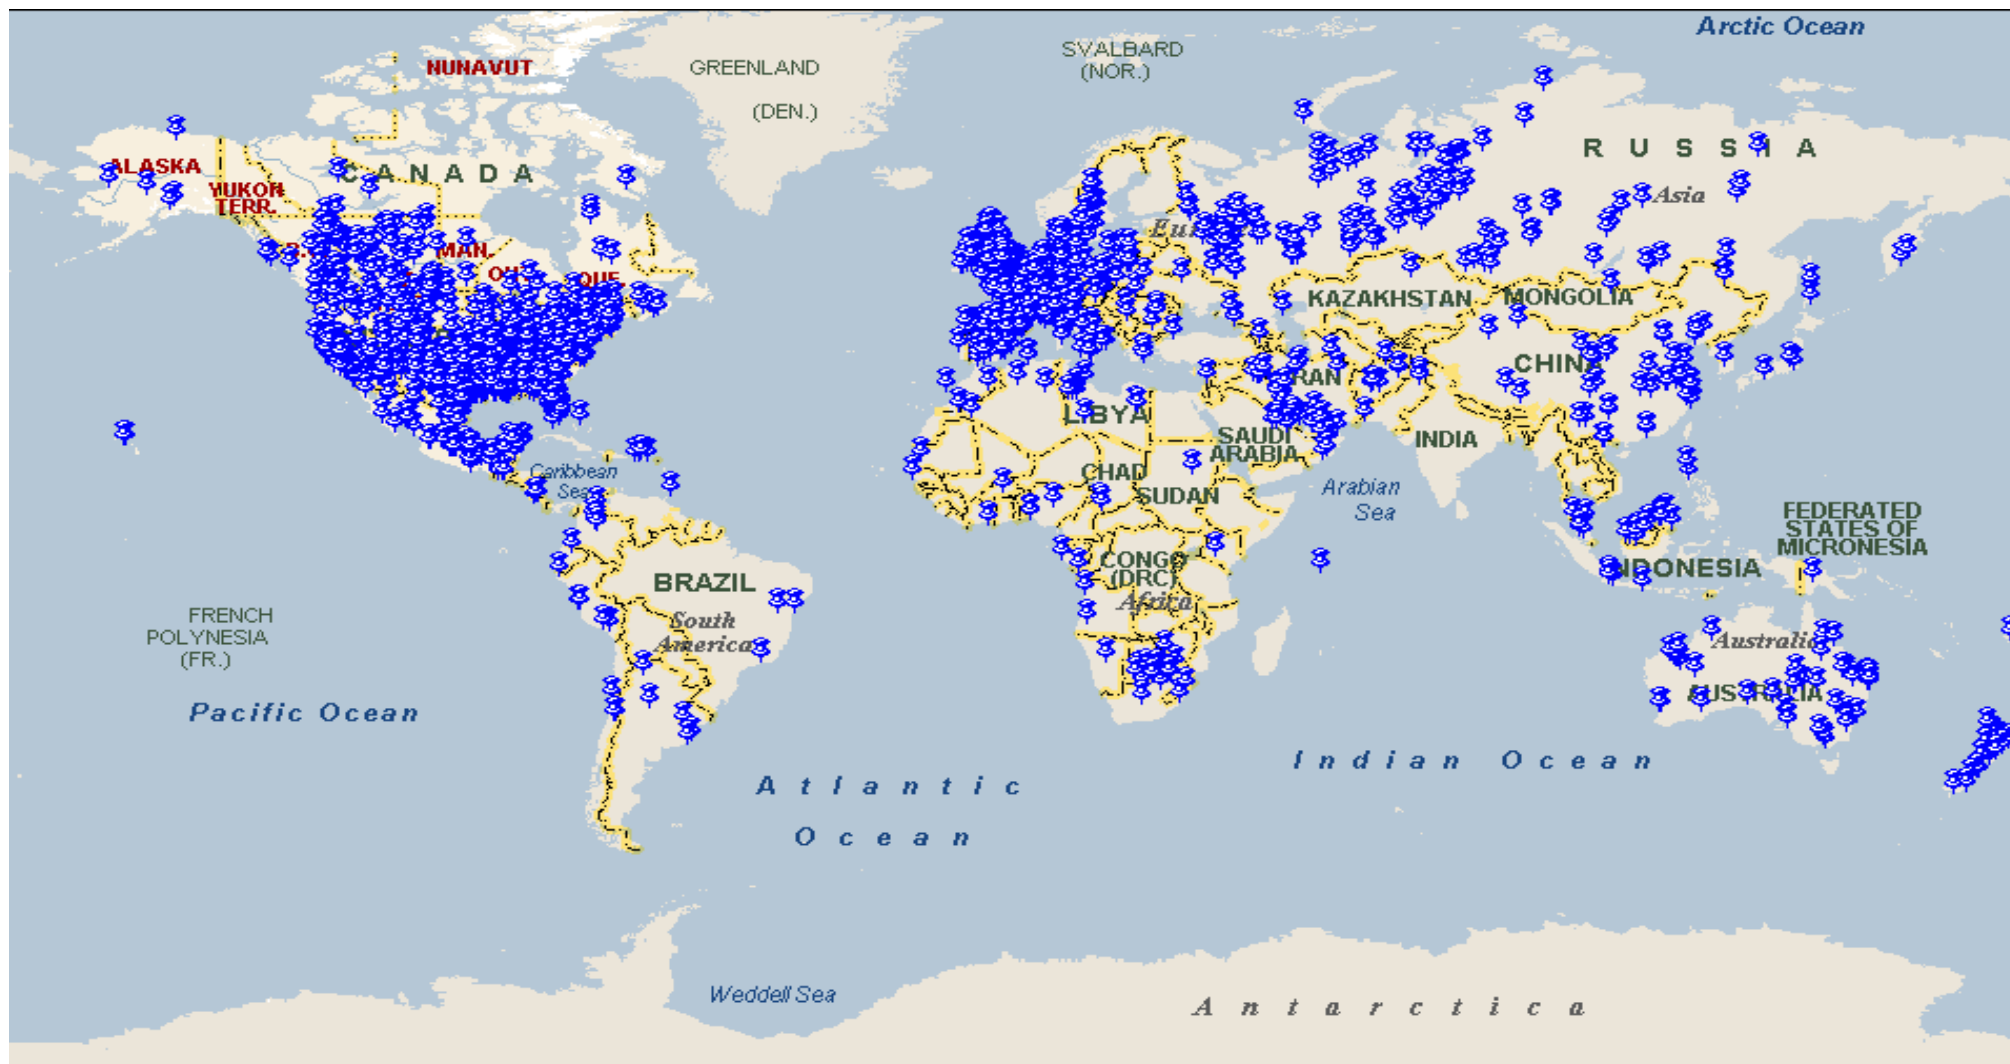

Commercial Markets Using Mobile SATCOM

- Government
- Military
- Emergency Response
- Disaster Recovery
- Blue Light Vehicles
- Oil & Gas
- Telecom Companies
- Banks
- Broadcasters
- Hospitals
- Schools
- Mining
- Events

iNetVu® Controllers

The iNetVu® Controller Series

7715 (19" Rackmount)

- Simple stand-alone one touch operation to find satellite and stow antenna
- Typical satellite acquisition time in less than 2 minutes
- Ideal for applications that require a quick, simple setup and reliable connection
- Supports DVB-S1 and DVB-S2/ACM frequencies (modem independent)
- Optimal, high-precision antenna pointing, supports inclined orbit satellites
- Remote access and operation via Network, Web and other Interfaces
- Built-in motion and movement protection for safety
- Internal DVB-S2X receiver for modem independence
- Integrated with 20+ modems (Hughes, iDirect, Newtec, Gilat, Viasat, Comtech, etc.)
- 7 methods of finding satellite

New Generation 1.2 m Auto-Acquire Ku-band DriveAway

NEW
GEN

iNetVu® 1202

Ka-band or Ku-band

- Field Upgradable to Ka-Band
- Low Stow, high-precision antenna pointing, near zero backlash
- Excellent Cross-pol performance
- Based on Eutelsat approved Skyware 1.2m Antenna, Type 125
- Works on all Ku Supported Services
- Characterized with Eutelsat* and Intelsat Compliant
- Patented sleek aerodynamic form (Patent # D696649 & D696650)
- Optimal high-precision antenna pointing
- Wind deflector pod (optional)
- 2-piece thermoset-molded reflector (optional)

1.2 m Auto-Acquire FlyAway

iNetVu® FLY-1202

FLY-1202G

FLY-1202V

- 1.2m FlyAway Antenna
Designed for Ku and X Band
- Low cost, high precision
antenna pointing, near zero
backlash
- Setup less than 15 minutes
- Tool less, Captive H/W
fasteners
- Fits in 4 Transportable Cases,
under 35kg ea.
- Based on Eutelsat approved
1.2m Skyware antenna

iNetVu® Manpack

Ku

X

NEW
GEN

Manpack systems can be easily configured to provide quick access to satellite communications for any application that requires remote connectivity in a rugged environment.

Ideally suited for applications that require a quick, simple set-up; in vertical markets such as emergency response, cellular backhaul, disaster management, public safety, broadcasting, media and more.

Simple to Assemble and Easy to Use

Manpack

Auto-Pointing System Option
Includes Onboard Controller

MP-60/80/100/130 - Manpack

- Complete satellite acquisition in seconds
- Super quiet operation, no noise
- IP 66 Rating of whole system
- Assembly in 4-5 minutes without tools
- High precision reflector petal can be interchanged among one system and over multiple systems
- Multiple bands support: Ku, Ka, X
- Supports manual operation with handwheels and indicators

SATCOM Business Innovating Aggressively

The worldwide Satellite business is a \$330+ billion market. Flat Panel Satellite Antennas represent a \$4 billion opportunity over the next decade.

Many big players, with very ambitious projects, are now getting involved:

OneWeb
(Eutelsat+Hughes+Bharti-India)
648 Satellites

Musk (SpaceX)
10,000 microsats

Bezos (Amazon-Kuiper)
3,236 satellite constellation

Telesat Lightspeed
188

Gates funding Kymeta

Entering the GOLDEN AGE OF the SATELLITE BUSINESS?

O3B, SpaceX, Amazon, OneWeb, Inmarsat, Telesat, Viasat, Intelsat, Hughes, Kepler, Eutelsat, AsiaSat, Space42 and others have large-scale goals.
All of these grand schemes require antenna design expertise.
All require reliable & high precision ground station antennas.
Can they be cost effective?

Low Cost Phased Array Antenna System for Ka-band Mobile SOTM

- C-COM Satellite Systems, in partnership with the University of Waterloo, is creating its first Phased Array Antenna (PAA).
- C-COM tested its Ka-band Phased Array modules using the company's **patented phase shifter technology** in 2020.
- **The proof-of-concept prototype has been successfully concluded by satellite tests in 2021.**
- The concept is based on modules that are small, but contain everything — the antenna, plus the electronic circuit, parts of the control circuitry, and local memory.

16x64 RX 4x4 Modules
(1024 Elements)

Advantages of Proposed Technology

INTELLIGENT CHIP BASED TECHNOLOGY

- System can have full control over each module
- Can perform electronic beam steering
- Can optimize the beam
- Can electronically scan 360 degrees
- **Scalable**
 - Gain can be increased by adding multiple modules
 - Allows for small building blocks which can be used to make any size of antenna;
- **Conformal**
 - Bends to fit various shaped surfaces

- **Dramatic cost reduction**
 - One antenna consists of several thousands' chips; a few hundred antennas could reach a volume of millions of chips.
 - It will be easy to reach “economies of scale”, leading to significant cost savings.
 - Applicable to many vertical markets
