C-COM ADOPTS SEMI-ANNUAL FINANCIAL REPORTING

OTTAWA, April 10, 2026 – C-COM Satellite Systems Inc., (TSXV: CMI and OTCQB: CYSNF) (the “Company”) a leading global provider of commercial-grade mobile auto-deploying satellite antenna systems, announced today that it has elected to rely on Coordinated Blanket Order 51-933 and move to semi-annual financial reporting (“SAR”).

Coordinated Blanket Order 51-933 allows eligible venture issuers listed on the TSX Venture Exchange to voluntarily move from a quarterly to a semi-annual financial reporting framework. Under the SAR pilot program, the Company will be exempt from filing interim financial reports and related Management’s Discussion & Analysis (MD&A) for its first and third quarters:

- **Interim Period:** The first interim period for which the Company will not file an interim report is the first quarter (Q1) ending February 28, 2026.
- **Ongoing Reporting:** The Company will continue to file audited annual financial statements and six-month interim financial reports within the applicable timeframes, but will not file three or nine-month interim financial reports going forward for as long as it remains eligible for SAR.

This news release is being filed pursuant to Coordinated Blanket Order 51 - 933 Exemptions to Permit Semi-Annual Reporting for Certain Venture Issuers and OSC Rule 51-507 Exemptions to Permit Semi-Annual Reporting for Certain Venture Issuers.

On behalf of the Board of Directors

Leslie Klein, Ph.D., P.Eng.

About C-COM Satellite Systems Inc.

C-COM Satellite Systems Inc. is a pioneer and a leading global designer, developer, and manufacturer of transportable and mobile satellite-based antenna systems. The Company has developed proprietary, auto-acquisition controller technology for rapid antenna pointing to a satellite with just the press of a button, enabling Broadband Internet via Satellite across a wide range of market applications worldwide, including regions unserved or underserved by terrestrial access technologies.

C-COM has sold more than 11,000 antenna systems, in over 100 countries, through a dedicated dealer network that provides service to a wide range of vertical markets such as Oil and Gas Exploration, Military Communications, Disaster Management, SNG, Emergency Communications, Cellular Backhaul, Telemedicine, Mobile Education, Government Services, Mobile Banking, and others. The Company's iNetVu® brand is synonymous with high quality, reliability, and cost-effectiveness.

C-COM is in the final stages of satellite testing and manufacturing of a potentially revolutionary Ka-band, electronically steerable, modular, conformal, flat panel phased array antenna. C-COM has developed this unique multi-orbit antenna with the intent of providing low-cost, high-throughput mobility applications over satellite for land, airborne and maritime verticals over LEO, MEO and GEO satellite constellations.

Another significant project underway at C-COM is the development of an 8-Channel Ka-band Analog Beamforming Integrated Circuit, (BFIC), which is progressing well and is now in the testing phase. These BFICs will be used in the manufacturing of all our ESA antennas with the intent to significantly reduce their cost and improve their performance. In addition, they will be made available to integrators and others developing Ka-band satcom solutions.

Forward Looking Statements

This news release contains forward-looking statements. These statements relate to future events or future performance and reflect management's current expectations and assumptions. Statements about C-COM's expectations for future results, its intention to continue testing and launch the Ka-

band flat panel multi-orbit antennas and our 8-channel beamformer integrated circuit its primary focus over the next couple years and the expectation that investment in R&D will generate returns to the company all contain forward-looking information. Several factors could cause actual events, performance or results to differ materially from the events, performance and results discussed in the forward-looking statements. Product testing may be delayed, may not have positive results or may result in necessary changes to the product design. Product development and launch may be postponed, delayed or, in the worst case, cancelled for many reasons outside C-COM's control, anticipated benefits of the new technology may not be realized, new products and services may not be released or, if released may not gain market acceptance and factors outside of C-COM's control may cause it to focus of its efforts and investments differently than described above. Any of those events and others could influence future performance and C-COM Satellite Systems Inc.'s ability to achieve the results mentioned above. These forward-looking statements are made as of the date hereof and C-COM Satellite Systems Inc. does not assume any obligation to update or revise them to reflect new events or circumstances. Readers are directed to the risk factors associated with the business of C-COM Satellite Systems in the company's most recent MD&A available at www.sedarplus.ca
